

Masoneilan* 35002 Series Camflex* II

Rotary Control Valves

Complete line of eccentric plug control valves effectively combining enhanced control performance, simplicity and long-term reliability for a broad range of applications.

Table of Contents

Features	1	C_v and F_L Versus Travel.....	6-7

Actuator Mounting Guide.....	3	Materials of Construction	9-13
General Data / Ratings and Connections.....	4-6	Dimensions and Weights	14-15

Features

The Camflex II valve is a heavy-duty, automatic-throttling control valve that incorporates the following features:

- The flangeless body rating is a rugged ANSI Class 600.
- Heavy-duty guide lugs assure quick, positive alignment during installation.
- The flanged version is available in 1 in. through 12 in. (25 mm through 300 mm) sizes in 150 or 300 ANSI, and 1 in. through 8 in. (25 mm through 200 mm) in 600 ANSI.
- The optional Camflex GR (Globe Replacement) version is available in 1 in through 6 in. sizes (25mm through 150mm) in ANSI Class 150, 300, and 600 ratings and allows direct replacement of conventional reciprocating globe valves.
- Separable bonnet design is available.
- Straight through flow pattern provides greater flow capacities.
- Standard integral extension bonnet allows for a wide range of fluid temperature applications (-320°F to 750°F), (-196°C to 400°C).
- The unique self-aligning eccentric rotating plug provides tight shutoff and low dynamic forces.
- A large variety of reduced-trim options are available in all sizes.
- The triple, over-sized bearing system provides exceptional plug shaft guiding.
- The shouldered shaft design provides robust blowout prevention.
- An optional patented differential velocity device (DVD) separates compressible flowstreams into a high velocity core and a low velocity envelope flowstream. This provides up to 18 dBA noise attenuation.
- Optional alloy constructions are available.
- The powerful, low-profile, spring-diaphragm actuator guarantees positive fail-safe action.
- Splined shaft and actuator linkages, combined with low-friction techniques, contribute to reduced deadband and hysteresis.
- The valve position indicator is large and highly visible.
- The actuator linkage (purge option available) is totally enclosed).

Numbering System

Actuator Mounting Guide

Camflex II Control Valves
(Mounted On Horizontal Pipeline)

3 5 - 3 5 . 0 2

Actuator Position in Relation to Valve Body
Numbering System : 1 to 8

NOTES:

- 2. Standard actuator mounting positions are shaded:
- 2. Plug positions are shown in the initial position without air on actuator.
- 3. The actuator must be always mounted above the pipeline.

Notes:

- It is recommended that the actuator always be mounted as shown above. For other positions, consult your local sales office.
- Installation is assumed to be in the horizontal pipeline for orientation of the airset and other accessories unless specified on the order.
- Action and orientation are field reversible without additional parts.
- Operating efficiencies may vary depending on valve configuration.
- The above schematic does not reflect every possible body/actuator orientation, but should serve as an effective guide.

General Data

• Body

Type:	<ul style="list-style-type: none">• cast with integral bonnet• cast with separable bonnet – 1 in.-8 in.
Flow Direction:	flow to open or flow to close (Differential Velocity Device trim flow to open only)
Materials:	<ul style="list-style-type: none">• carbon steel• 316 stainless steel (flangeless)• 316L stainless steel (flanged)• Hastelloy C (1 in.-4 in.) (DN 25-100)¹
Body Pressure Rating:	ANSI Class 600 (per B16.34) standard (1 in.-12 in.) (DN 25-300), except for flanged construction: valve rating is limited by flange rating
End Connections:	<ul style="list-style-type: none">• threaded – NPT for ANSI Class 600 rated connections (1 in.) (DN 25)• flangeless – clamps between ANSI Class 150, 300 or 600 rated flanges (flange rating must be specified for 8 in.-12 in. (DN 200-300) valve for locator lug drilling and tapping)• flanged - bolts to ANSI Class 150 or 300 rated flanges (1 in.-12 in.) (DN 25-300) ANSI Class 600 rated flanges (1 in.- 8 in.) (DN 25-200)• GR flanged - bolts to ANSI Class 150, 300 or 600 rated flanges (1 in. - 6 in.) (DN 25-150)

• Trim

Plug Type:	self-aligning eccentrically rotating
Materials:	<ul style="list-style-type: none">• 1 in.-2 in. (DN 25-100): solid Stellite No. 6• 3 in.-4 in. (DN 80 & 100): solid Stellite No. 6 optional• 3 in.-12 in. (DN 80-300): 316L stainless steel with hardfaced seating surface• 1 in.-4 in. (DN 25-100): Hastelloy C¹
Seat Ring:	solid clamped
Materials:	<ul style="list-style-type: none">• 1 in.-12 in. (DN 25-300): 316 stainless steel• 1 in.-4 in. (DN 25-100): Hastelloy C¹• 1 in.-12 in. (DN 150-300): 316 stainless steel with hardfaced seat• 1 in.-4 in. (DN 25-100): solid Stellite No. 6 optional• 1 in.-12 in. (DN 25-300): 316 stainless steel with PTFE insert (to 450°F), (232°C)²
Retainer:	316 Stainless Steel
Capacity:	full area and reduced capacity in all sizes
Flow Characteristic:	<ul style="list-style-type: none">• standard trim: linear• low flow trim (.036 + .07 factor): linear (requires SVI)• differential velocity device: linear
C _v Ratio:	<ul style="list-style-type: none">• standard trim >100:1• low flow trim 15:1• differential velocity device >50:1

• Actuators

Spring-Opposed Rolling Diaphragm

Size:	<ul style="list-style-type: none">• 4½ in. diameter with 3½ in. (89mm) stroke (1 in.-2 in. valves), (DN 25-50)• 6 in. diameter with 5¾ in. (146mm) stroke (3 in.-4 in. valves), (DN 80-100)• 7 in. diameter with 7¼ in. (184mm) stroke (6 in.-12 in. valves), (DN 150-300)• 9 in. diameter with 7¼ in. (184mm) stroke (6 in.-12 in. valves), (DN 150-300)
Range:	<ul style="list-style-type: none">• 7-15 psi (1 in.-4 in.), (DN 25-100)• 7-24 psi (6 in.-12 in.), (DN 150-300)(7 in. diameter actuator)• 7-24 psi (6 in.-12 in.), (DN 150-300) (9 in. diameter actuator, Air to Close)• 8-25 psi (6 in.-12 in.), (DN 150-300) (9 in. diameter actuator, Air to Open)
Air Connection:	1/4 in. NPT
Yoke:	cast iron
Bearing:	sealed radial
Auxiliary Handwheel:	solid disk with locking nut: <ul style="list-style-type: none">• 6½ in. diameter (1 in.-4 in. valves), (DN 25-100)• 10 in. diameter (6 in.-12 in. valves), (DN 150-300)

Manual Actuator

Type:	Solid disk with detent anti-rotation device. Continuously connected.
Sizes:	<ul style="list-style-type: none">• 7 in. (178mm) diameter (1 in.-2 in. valves), (DN 25-50)• 8⅞ in. (225mm) diameter (3 in. & 4 in. valves), (DN 80-100)• 16⅞ in. (410mm) diameter (6 in.-12 in. valves), (DN 150-300)
Material:	aluminum
Yoke:	cast iron
Bearing:	sealed radial ball

¹ See materials of construction

² Not available in .2 factor or Low Flow Trim sizes

General Data

Standard Spring Diaphragm Actuator Materials

Description	Material
Yoke	Cast Iron
Yoke Covers	Polycarbonate
Spring Barrel	Die Cast Aluminum
Diaphragm Case	Die Cast Aluminum
Piston	Die Cast Aluminum
Diaphragm	Buna-N with Dacron Insert
Piston Rod	303 St. St.
Clevis	Carbon Steel Zinc Dichromate Plated
Clevis Pin	17-4 PH (H1075) St. St.
Lever	Steel With Epoxy Surface
Lever Bearing	PTFE Filament Surface Bonded to Glass Reinforced Plastic Backing
Handwheel and Locknut	Aluminum

Standard Actuator Characteristics and Travel Times

[Measured with direct positioner at 30 psi (2 bar) supply, 4700P positioner with tubing size ¼ in.]

Actuator Diameter		Diaphragm Effective Area		Actuator Stroke		Travel Time (sec.)	
in.	cm	sq. in.	cm ²	in.	cm	Increasing Instrument Signal	Decreasing Instrument Signal
4½	11.4	14	90	3½	8.9	1.2	2.4
6	15.2	24	155	5¾	14.6	3	6.3
7	17.8	36	232	7¼	18.4	7.6	9.8
9	22.9	75	483	7¼	18.4	17	24

Temperature/Seat Leakage

Valve Size		Seat Type	Temp. Range ¹		Max. Seat Leakage, ANSI FCI/70.2 Class
in.	DN		Min.	Max.	
1-12	25-300	Metal	-320°F ¹ (-196°C)	+750°F (400°C)	IV
		Soft Seat ²	-320°F ¹ (-196°C)	+450°F (232°C)	VI

¹ For Stainless Steel Bodies only.

² Temperature limited by Teflon® Seal.

Temperature Gradient Across Standard Integral Bonnet

The ability of the Camflex valve to handle a wide range of process fluid temperatures is due to the long, integrally-cast bonnet. This affords ample radiation surface to normalize the packing temperatures.

Note: The differential velocity device is used for aerodynamic noise reduction. It **must** be used with **.6 factor trim flow to open**.

Materials of Construction

Body with Separable Bonnet

Body

Body with Integral Bonnet

Optional Slurry Package Seal Bushings

Lower Guide Bushing

Upper Guide Bushing

Standard Camflex Packing Arrangement

EF Seal

(Emission Free)

Double O-Ring Seal Packing Follower

Fugitive Emission Containment Package for Zero Leakage¹

Provides long term reliable extremely low emission shaft seal performance. This economical solution to fugitive emissions will not compromise control performance, and is suitable for use in environmentally sensitive applications.
