

AirCon C Series

**Pneumatic rack & pinion
Rotary actuators
Spring return & double acting
Travel stop adjustments 5%
Optional travel stop for 100%**

TB-page 154-18

Sizes Ranging from 55 in-lbs to 28500 in-lbs Standard

TB-page 155A-18

Series XB

Extended Range Series

AirCon heavy duty rack and seven pinion actuators offer a broad range of torques up to 1,565,800 inch lbs

AirMax Cylinder Type

**Dependable high-cycle operation
The AirMax Actuator is the most efficient pneumatic actuator available, delivering precise reliable automation for all types of control valves.**

TB-page 68-17-A

TB-page 156-15

Kompact 4 Series

Space saving - fast acting four piston design- increased number of pistons allows for a smaller piston diameter, allowing less air consumption to reduce size while maintaining its high output torques.

Automator Series

**Spring-Diaphragm Actuator
designed & developed specifically for valves that require precise control with low air supply.
Torque range; 133 to 12680 inch lbs**

INOX Series

**304 & 316 Stainless Steel
Pneumatic rack & pinion
Actuators suitable for highly
corrosive environments.**

TB-page 152-17

PRO-torq electric actuators

Pro-Torque Series

**Electric actuators built for
Industrial process &
commercial applications.
Torque Range : 90 - 177,000 inch lbs.**

POWER STROKE

The Power-Stroke Series is a heavy-duty product line of pneumatic actuators ideal for operating a higher torque ball, butterfly, or plug valves.

Our Scotch-Yoke design mechanism produces a torque curve that closely matches requirements of valve actuation when converting linear to rotary motion.

The Scotch-Yoke produces greater torque at the beginning and the end of each stroke of the piston, precisely where it is required to operate most valve types.

Scotch-Yoke Actuators
